NO MORE NAILS

General Purpose Construction Adhesive

PRODUCT

Bostik No More Nails is a multi purpose construction adhesive

DESCRIPTION

Bostik No More Nails general-purpose adhesive is suitable for interior or exterior general construction work. Being highly water resistant, styrene safe with high initial grab. It is a very versatile product.

No More Nails is a gunnable, synthetic rubber based adhesive which exhibits excellent green strength, flexibility, good temperature resistance and good slump resistance.

RECOMMENDED USES

- As a contact adhesive for installation of wall and floor panels.
- Most bonding applications where high strength, gap filling, one component adhesive is required.
- Timber, metal, cementitious and plaster sheets to timber or metal studs.
- Installation of battens or other fixings to brick, masonry or concrete walls.
- General-purpose construction adhesive.
- Suitable to use on foamed polystyrene.
- Ideal for mirror backed tiles.

FEATURES & BENEFITS

- Nail free general construction adhesive.
- High bond strength
- Excellent adhesion and sealing properties.
- Excellent green strength.
- Good temperature resistance.
- Chemical resistant.
- Good slump resistance.
- Bonds a variety of construction and building materials.
- Ideal for interior and exterior applications.
- Easy to use and cost effective.

PERFORMANCE PROPERTIES

Appearance	Thixotropic, heavy paste like consistency
Colour	Straw/beige
Odour	Light solvent smell
Viscosity	Approx. 110,000 cps @ 25°C
Solids content	Approx. 77%
Specific Gravity	1.16 g/cm ³
Flammability	Flammable – Flashpoint -20°C
Chemical Resistance	Very good
Service temperature	-30°C to +80°C
Working time (initial contact)	5-10 minutes, depending on temp.
Open time (reposition)	20 to 30 minutes depending on temp.

Maximum bond	12-72 hours depending on temp & thickness
--------------	---

Bostik No More Nails meets the specification of Australian Standard AS2329-80 (Mastic adhesives for fixing wallboards).

PACKAGING

No More Nails is available in 320gm (300ml) cartridges, 20 per box. 920gm (850ml) cartridges, 12 per box. Also 75gm blister tube, 12 units per case. A 20lt size is available upon request (**Bostik 1862**)

COVERAGE

10 lineal metres of 5mm bead from a 320gm cartridge.

APPLICATION INSTRUCTIONS

Bostik No More Nails can be applied either as a two-way contact or a one-way stick adhesive. In both cases the first requirement is that both surfaces to be bonded are clean and dry and free of grease, oil or dust. Any loose or flaking paint must be removed and lightly sanded before application. (Substrate surface temperatures should not exceed 30°C and the product should not be used where continued exposure to elevated temperatures will occur). To one of the freshly prepared surfaces apply a 4-6mm bead of adhesive with a cartridge or extrusion gun, or similar type profiles with a notched trowel. Beads should not be more than 45cm apart and butt joints should be adhered on both panel edges. Bring both surfaces together immediately.

• Two-Way Method

Press firmly over entire surface to transfer adhesive and then pull both surfaces apart. Allow to tack-off for a few minutes (3-5 minutes depending on ambient weather conditions) and then reposition and press firmly together. Contact areas should then be tapped with a hammer via a padded block to ensure intimate contact.

Depending on the weather conditions and surfaces bonded, maximum bond strength will take from 12-72 hours to be reached. Some weighted panels may require temporary mechanical fastening that should be retained for at least this period.

• One-Way Method

This method is recommended for heavier panels or those that are formed to place a loading or stressed memory on the bond line.

After applying adhesive and bringing substrates together, they should be sufficiently clamped, nailed or screwed in a fashion that maintains maximum surface contact at bonded interfaces. Mechanical fasteners should be retained if highly stressed; but temporary fastening can be released after a minimum of 24 hours.

For flooring applications, the adhesive should be applied to the flooring manufacturer's specifications. To stop floors squeaking, apply a bead of adhesive into the groove of each board after it is laid and immediately prior to mating the tongue from the next panel or board.

PRECAUTION

- Always test prior to bonding with this product.
- Plasticiser migration can occur with some PVC materials.
- Veneer plywood can be affected by solvent soaking through the ply causing bubbling of the veneer.

P.A.T.S (Pretested Adhesion To Substrate) Programme

Bostik offer a service in which a program has been established to eliminate potential field problems by pre-testing Bostik adhesives with samples of building materials to which the adhesive will be applied. This service is available on large projects where pre-application testing will aid in determining the proper surface preparation method to achieve optimum adhesion. Consult a Bostik representative for further information.

HEALTH AND SAFETY

- If working in an area with poor ventilation or in a confined area, Bostik recommend a mask be worn.
- Avoid contact with skin, eyes and avoid breathing in vapour.
- If swallowed contact doctor or Poisons Information Australia If skin contact occurs, wipe off excess and

remove contaminated clothing. Wash affected area thoroughly with soap and water.

- For more detailed information refer to Material Safety Data Sheet.

CLEAN-UP

Any wet or partially wet adhesive can be removed with scraping and **Bostik Solvent 9901**. Dried adhesive is best removed with a scraper or by sanding.

STORAGE/SHELF LIFE

Store in cool (below 25°C) dry area out of sunlight and in a well-ventilated area. Keep containers securely sealed. Store away from foodstuffs and incompatible materials. Dangerous Goods Class 3 must be transported in accordance with State regulations. A shelf life of a minimum of 12 months is expected if stored as above.

FIRE

Sealant and vapour are flammable when temperatures exceed flash point. Keep away from flames or source of ignition.
